PHYSICA A

Abstracted/Indexed in: Current Contents: Physical, Chemical & Earth Sciences/EI Compendex Plus/Engineering Index/INSPEC

Volume 247, Nos. 1–4 **15 December 1997**

Contents

Random systems

Directed percolation with an absorbing boundary
K.B. Lauritsen, K. Sneppen, M. Markošová and M.H. Jensen 1

An effective medium model for the electric conductivity of an N-component anisotropic and percolating mixture
J.M.V.A. Koelman and A. de Kuijper 10

Low-frequency Raman scattering in model disordered solids: percolators above threshold
O. Pilla, G. Viliani, R. Dell'Anna and G. Ruocco 23

Aspects of dielectric breakdown in a model for disordered non-linear composites
A.K. Gupta and A.K. Sen 30

Wavelet cascades
J. Giesemann, M. Greiner and P. Lipa 41

Cluster growth by diffusion-limited aggregation in shear flow
T. Kovács and G. Bárdos 59

Effects of convection and friction on size segregation in vibrated granular beds
T. Elperin and E. Golshtein 67

Branched critical multifractality and morphological phase transitions
A. Bershadskii 79

Lyapunov exponent of random walkers on a bond-disordered lattice
L. Acedo and M.H. Ernst 91

Fluids, solids, interfaces and supramolecular fluids

Diameters of rotationally and vibrationally excited diatomic molecules
Y.E. Gorbachev, F.J. Gordillo-Vázquez and J.A. Kunc 108

Generalized collective mode approach in the dielectric theory of dipolar systems
I.P. Omelyan 121

Mutual diffusion in a liquid mixture of argon and krypton
J.C. Lee 140

A note on stages of evolution in a 2D froth
H.J. Ruskin and Y. Feng 153

Rods near curved surfaces and in curved boxes
K. Yaman, M. Jeng, P. Pincus, C. Jeppesen and C.M. Marques 159

Microscopic theory for hopping transport in glass-forming liquids
C.Z.-W. Liu and I. Oppenheim 183

Contents continued inside

0378-4371(19971215)247:1-4;1-Q

PHYSICA A
Volume 247, Nos. 1–4 **15 December 1997**

Contents (continued)

Counterion condensation on ionic oligomers
G.S. Manning and U. Mohanty 196

Aggregation of colloidal particles induced by polymer chains: The RISM integral equation theory
P.G. Khalatur, L.V. Zherenkova and A.R. Khokhlov 205

Melting of a colloidal crystal
P.S. Kuhn, A. Diehl, Y. Levin and M.C. Barbosa 235

A new model for size-distribution function in living polymers
F. Aliotta, M.E. Fontanella, M. Sacchi and C. Vasi 247

Effect of pressure and of doping on superconductivity in the double-mercury-layer cuprate Hg_2 ($N = 2$). A quantitative analysis based on indirect-exchange pairing
L. Jansen and R. Block 265

Dynamical processes

Mode competition in a system of two parametrically driven pendulums; the role of symmetry
E.J. Banning, J.P. van der Weele and M.M. Kettenis 281

Noise-sustained currents in quasigeostrophic turbulence over topography
A. Alvarez, E. Hernández-García and J. Tintoré 312

Damage spreading in the 'sandpile' model of SOC
A. Bhowal 327

3D self-locking of self-avoiding walks
A.A. Ovchinnikov and V.V. Atrazhev 331

Rates and mean first passage times
R. Müller, P. Talkner and P. Reimann 338

Universal properties of the $mA + nB \rightarrow \emptyset$ diffusion-limited reaction
T. Sasamoto, S. Mori and M. Wadati 357

Relaxation of coherent states and two scaling laws of characteristic times in quantum chaos
M. Kollmann and H.W. Capel 379

Path functional theory for optimal transport in steady state urban traffic networks
H. Lehmann 405

Fokker–Planck equation and non-linear hydrodynamic equations of a system of several Brownian particles in a non-equilibrium bath
J.-E. Shea and I. Oppenheim 417

A simulation technique for many spheres in quasi-static motion under frame-invariant pair drag and Brownian forces
R.C. Ball and J.R. Melrose 444

Testing predictability of symbolic sequences using time-delay embedding
L. Cao 473

Scaling properties of coding and non-coding DNA sequences
A. Provata and Y. Almirantis 482

Contents continued on previous page

Volume 247, Nos. 1–4 **15 December 1997**

Contents (continued)

Mathematical statistical physics

SCOZA for continuous spins
J.S. Høye and G. Stell 497

Exact solutions for inelastic neutron scattering from planar Ising ferromagnets
M. Khatun and J.H. Barry 511

Transport properties in reacting mixture of polyatomic gases
A. Chikhaoui, J.P. Dudon, E.V. Kustova and E.A. Nagnibeda 526

An efficient Monte Carlo algorithm for overcoming broken ergodicity in the simulation of spin systems
I. Andricioaei and J.E. Straub 553

Fisher's information measure in a Tsallis' nonextensive setting and its application to diffusive processes
F. Pennini and A. Plastino 559

Cumulative author index of Volumes 241 to 247 570

Index of authors and papers to Volume 247 575
